PUBLICATIONS:

1) Roberts JS, Wenger NK. Pacemaker Twiddler's Syndrome. American Journal of Cardiology 1989;63: 1013-1016

INVESTIGATIONS - RESEARCH:

1) Percutaneous Balloon Pericardiotomy For The Treatment Of Pericardial Effusion/Tamponade.

- Registry Participant

- Principle Investigator: Andrew Ziskind, M.D., University of Maryland

2) Phase II Clinical Study In Patients To Examine The Ability Of Sprodiamide Injection (WIN 59080) When Used In Conjunction With Cine MR Imaging To Detect Left Ventricular Wall Motion Abnormalities, Permit The Calculation Of Ejection fractions And To improve Reproducibility Of Wall Thickness Determinations.

- Sterling Winthrop Pharmaceuticals Research Division

INVESTIGATIONS - RESEARCH CONTINUED...

3) An Open-Label Study Of Novastan (Brand Of Argatroban) In Patients With Heparin-Induced Thrombocytopenia/Thrombosis Undergoing PTCA, Atherectomy Or Stent Implantation.

- Principle Investigator At Baptist Hospital Of Miami

- Phase III Clinical Trial, Texas Biotechnology Corporation

4) **ALIVE** Trial (Proctor & Gamble). Principal Investigator. Azimilide Dihydrochloride's potential for decreasing all-cause mortality in a target population at high risk of sudden cardiac death.

5.) INVEST (Knoll Pharmaceuticals). Principal Investigator.

International clinical trial comparing a calcium antagonist (Verapamil SR) with a non-calcium antagonist treatment strategy (Atenolol) for the control of hypertension in patients with coronary artery disease.

6.) DISTINCT Trial. Coinvestigator. Biocompatibles *BiodivYsio* (TM) Stent in Randomized Control Trial. *BiodivYsio* (TM) Stent versus the ASC Multi-link Duet Stent concerning the six-month Target Vessel Failure(TVF) rate.

7.) BRAVO Trial (Smith/Kline/Beecham). Coinvestigator.

Phase III Clinical trial of lotrfiban, an oral GPIIB/IIIa receptor blocker, vs placebo in patients with documented coronary, cerebral or peripheral vascular disease.

8.) CAMELOT (Pfizer). Coinvestigator.

Patients with proven coronary artery disease randomized to amlodipine vs enalapril vs placebo followed for two years to detect adverse coronary or cerebral events.

9.) ATLAS Trial. (Angiosonics) Coinvestigator A Randomized Control Trial: Acolysis or ReoPro therapy for thrombolysis followed by definitive percutaneous interventional treatment of the underlying stenosis with the saphenous vein bypass grafts in patients with acute coronary syndrome.

10.) PRESTO Trial. (Smith/Kline/Beecham). Principle investigator. Randomized placebo controlled trial to assess the efficacy of Tranilast in preventing restenosis post percutaneous coronary intervention.

11.) ESPRIT Trial. (COR Therapeutics/Duke Clinical Research).

Coinvestigator. Randomized placebo controlled trial to assess the outcome of Integrilin used during percutaneous coronary interventions.

12.) VASOSEAL OTA Trial. (Datascope) Coinvestigator.

Evaluation of Vasoseal OTA arteriotomy closure device following diagnostic angiography via the common femoral artery. Highest enroller nationwide.

INVESTIGATIONS - RESEARCH CONTINUED...

- 13.) BIODISC Trial.** Coinvestigator.
Evaluation of the BIODISC arteriotomy closure device following angiography via the common femoral artery. Highest enroller nationwide.
- 14.) QUICKSEAL Trial.** Coinvestigator.
Evaluation of the QUICKSEAL arteriotomy closure device following coronary interventional procedures via the common femoral artery.
- 15.) SYNERGY Trial.** (Aventis). Principal Investigator.
Enoxaparin vs heparin in acute coronary syndrome patients undergoing cardiac cath.
- 16.) ACTIVATE Trial** (Sankyo). Principal Investigator.
ACAT Inhibitor CS505 versus placebo for reducing coronary atherosclerosis using coronary IVUS imaging.
- 17.) Pfizer IVUS Trial** (Pfizer) Principal Investigator
Atorvastatin/CP529,414 (CETP inhibitor) versus Atorvastatin/placebo for reducing coronary atherosclerosis using coronary IVUS imaging.
- 18.) EVEREST Trial** (Otsuka). Principal Investigator
Tolvaptan (vasopressin antagonist) versus placebo in the class III or IV CHF patient with LVEF < 40%.
- 19.) ACUTY Trial** (Medicines Company). Principal investigator.
Bivalirudin versus heparin with or without IIb/IIIa GP platelet inhibition, in acute coronary syndrome patients undergoing cardiac catheterization.

CLINICAL DUTIES:

- **Interventional Cardiology**
Perform all cardiac cath lab procedures, including diagnostic procedures, balloon angioplasty, directional and rotational atherectomy, coronary stenting, intracoronary ultrasound, intracoronary brachytherapy, PFO closure.
- **Consultative Cardiology**
Inpatient and outpatient care of cardiology patients.
- **Acute Care Cardiology**
CCU and ER care of acutely ill cardiac patients.
